

<i>Updates to Profile, Donor 580-PRS</i>	
Update Available	Yes
Updates - Personal	
Updates - Medical	
Updates - Family Medical History	<p>Note: This donor also donated at The Sperm Bank of California (TSBC) as Donor 1830. We are working with TSBC to monitor family numbers. Update July 2024: A child from this donor is reported with autism spectrum disorder and seizures. Update March 2025: TSBC has received medical updates on several donor conceived adults from their donor 1830 (also PRS 580). The following diagnoses were disclosed that based on current knowledge, are unlikely to have significantly increased inheritance risk to second-degree relatives: MASLD, Cyclothymia, Functional Neurological Disorder (FND). In addition, there are medical updates that may increase the risk for other children from this donor. ASD, ADHD, OCD, Depression, GAD, and Chronic Pain Disorders.</p>
